Name:	School:	Grade:
--------------	----------------	---------------

Academics:	Present Level	If there is a gap, indicate Planned Action
Algebra I		
Algebra II		
Geometry		
Chemistry		
Physics		
11th Grade Reading and Comprehension Levels		
Oral and Written Communication		
Basic Computer Skills - Hardware and Software		
Ecology - Impact of the POS on the Environment		

Abilities: (see glossary below)		
Trunk Strength		
Visual Color Discrimination		
Depth Perception		
Oral Expression		
Selective Attention		
Written Comprehension		
Auditory Attention		
Category Flexibility		
Far Vision		
Memorization		
Response Orientation		
Sound Localization		
Speech Clarity		
Speech Recognition		
Fluency of Ideas		
Speed of Closure		
Static Strength		
Speed of Limb Movement		
Time Sharing		
Written Expression		
Dynamic Strength		
Gross Body Coordination		
Originality		
Rate Control		
Stamina		
Wrist-Finger Speed		
Gross Body Equilibrium		
Number Facility		
Glare Sensitivity		
Mathematical Reasoning		
Peripheral Vision		
Spatial Orientation		
Night Vision		
Explosive Strength		
Dynamic Flexibility		

Glossary

Arm-Hand Steadiness — The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.

Control Precision — The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.

Finger Dexterity — The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.

Problem Sensitivity — The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.

Manual Dexterity — The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.

Multilimb Coordination — The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.

Near Vision — The ability to see details at close range (within a few feet of the observer).

Hearing Sensitivity — The ability to detect or tell the differences between sounds that vary in pitch and loudness.

Deductive Reasoning — The ability to apply general rules to specific problems to produce answers that make sense.

Extent Flexibility — The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.

Flexibility of Closure — The ability to identify or detect a known pattern (a figure, object, word, or sound) that is hidden in other distracting material.

Inductive Reasoning — The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).

Information Ordering — The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations).

Perceptual Speed — The ability to quickly and accurately compare similarities and differences among sets of letters, numbers, objects, pictures, or patterns. The things to be compared may be presented at the same time or one after the other. This ability also includes comparing a presented object with a remembered object.

Reaction Time — The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.

Visualization — The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.

Oral Comprehension — The ability to listen to and understand information and ideas presented through spoken words and sentences.

Trunk Strength — The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without 'giving out' or fatiguing.

Visual Color Discrimination — The ability to match or detect differences between colors, including shades of color and brightness.

Depth Perception — The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.

Oral Expression — The ability to communicate information and ideas in speaking so others will understand.

Selective Attention — The ability to concentrate on a task over a period of time without being distracted.

Written Comprehension — The ability to read and understand information and ideas presented in writing.

Auditory Attention — The ability to focus on a single source of sound in the presence of other distracting sounds.

Category Flexibility — The ability to generate or use different sets of rules for combining or grouping things in different ways.

Far Vision — The ability to see details at a distance.

Memorization — The ability to remember information such as words, numbers, pictures, and procedures.

Response Orientation — The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.

Sound Localization — The ability to tell the direction from which a sound originated.

Speech Clarity — The ability to speak clearly so others can understand you.

Speech Recognition — The ability to identify and understand the speech of another person.

Fluency of Ideas — The ability to come up with a number of ideas about a topic (the number of ideas is important, not their quality, correctness, or creativity).

Speed of Closure — The ability to quickly make sense of, combine, and organize information into meaningful patterns.

Static Strength — The ability to exert maximum muscle force to lift, push, pull, or carry objects.

Speed of Limb Movement — The ability to quickly move the arms and legs.

Time Sharing — The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).

Written Expression — The ability to communicate information and ideas in writing so others will understand.

Dynamic Strength — The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.

Gross Body Coordination — The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.

Originality — The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.

Rate Control — The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.

Stamina — The ability to exert yourself physically over long periods of time without getting winded or out of breath.

Wrist-Finger Speed — The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

Gross Body Equilibrium — The ability to keep or regain your body balance or stay upright when in an unstable position.

Number Facility — The ability to add, subtract, multiply, or divide quickly and correctly.

Glare Sensitivity — The ability to see objects in the presence of glare or bright lighting.

Mathematical Reasoning — The ability to choose the right mathematical methods or formulas to solve a problem.

Peripheral Vision — The ability to see objects or movement of objects to one's side when the eyes are looking ahead.

Spatial Orientation — The ability to know your location in relation to the environment or to know where other objects are in relation to you.

Night Vision — The ability to see under low light conditions.

Explosive Strength — The ability to use short bursts of muscle force to propel oneself (as in jumping or sprinting), or to throw an object.

Dynamic Flexibility — The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.
